Order to Show Cause
No. 43-045-001

IN THE MATTER OF
THE APPROVAL OF
THE NOTICE OF INTENT
AND RECLAMATION
PLAN SUBMITTED BY
R.D.M.&S. PARTNER-
SHIP, WHITEROCK
CLAIMS, TOOELE AND
UTAH COUNTIES, UTAH.

THE STATE OF UTAH TO
ALL PERSONS INTEREST-
ED IN SECTIONS 33 and 34,
TOWNSHIP 8 SOUTH 3
WEST, SLBM, TOOELE AND
UTAH COUNTIES, UTAH.

Notice is hereby given that tentative approval has been given by the Utah Division of Oil, Gas, and Mining to R.D.M. & S. partnership, P.O. Box 314, Orem, Utah, 84057, to conduct a surface limestone mining and milling operation on the Whiterock group of claims, numbered 1 to 10, Sections 33 and 34, Township 8 South, Range 3 West, SLBM, Tooele and Utah Counties, Utah. R.D.M. & S. partnership is represented by Mr. Jack Madsen of Provo, Utah. Other partners include: Mr. Darrel L. Ross, Provo, Utah; Mr. H. Clyde Davis, Orem, Utah; and Mr. Lynn Stewart, Stillwater, Oklahoma. The proposed mine is unnamed.

R.D.M. & S. partnership has fulfilled all obligations under the Mined Land Reclamation Act of 1975 (Section 40-8) Utah Code Annotated, 1953, as amended, and tentative approval has been given to conduct surface limestone mining and milling operations with the following procedures:

a) High-grade limestone from the Mississippian Gardison and Mississippian Fitchville Formations will be drilled, blasted, removed, and milled through-
b) The residual slope after mining will be left along the natural dip of the formation. The operator will have caused to be made, berms, at least 20 feet in horizontal width located every 200 feet along the slope distance. Said berms shall be of consolidated rock as well as a part of the residual formation and shall follow the existing contour at a particular elevation.

My Commi

c) The seeding, planting, or otherwise necessary revegetat- ing will be performed on the berms upon abandonment and

on the mill site when operations have permanently ceased. Plant species to be used are those specified in the reclama- tion plan.

d) Sufficient fertilizer will be utilized in conjunction with plantings; dictated by soil analysis.

Five years from the final approval of the notice of intent, berms will be evaluated by the Division for the presence of plant support materials (soils). If this evaluation proves that no soil is present on the berms, the operator will spread 4 to 6 inches of soil available from alluvial or colluvial deposits on adjoining claims onto the berms. When the supply of available soil is depleted, as determined by the Division, no further soil spreading will be required.

Before final abandonment, maximum residual slope for bare rock will be 100% (45°). Reject or soil piles will be graded to 30% (17°), or less prior to final abandonment, if any such piles are left. A sign will be placed at the mine stating the mine location, time and place heretobe es- tablished, appear before the Board of Oil, Gas, and Mining, to show cause, if any there be, why this plan should not be approved.

DATED this 9th day of February, 1976.
